FEATURES
The POLAR WHITE series is a superb collection of glazed white rectified ceramic tiles. The availability of polished and matte finishes provides the ideal solution for all your wall coverings in seamless continuity and timeless beauty.

PRODUCT INSTALLATION
POLAR WHITE can be cut by the standard score and break method. Where cut-outs, special shape or accurate measurement are required, a wet saw is highly recommended to achieve best result. Tile adhesive and grout materials must conform to local current standards requirements and be recommended by the adhesive manufacturer based on the actual application requirements.

The use of a Non-Sanded grout is recommended to avoid scratching the tiles surface during application. Tile adhesive, grout or any joint filling materials must not be left on the surface of the tiles to cure, such residue could damage the tile surface during the removal if hard set.

Movement joints must be provided throughout the work to conform to local standards. For running tiles in a brick bond patterns, we recommend a maximum 33% offset.

An anti-fracture or waterproof membrane should be used in all wet areas installations or where substrates settling movements are expected.

Please follow the instructions in the tile packaging at all times. Tiles must be inspected before commencing any installation. The use or installation of the product is considered as approval of the material and no claim will be accepted.

Available Sizes and Patterns:

**Tile**
- 150x75mm (6”x3”)
- 300x100mm (12”x4”)
- 600x100mm (24”x4”)
- 600x150mm (24”x6”)
- 600x300mm (24”x12”)

**Mosaic**
- Diamond
- Herringbone
- Diamond Cube
- Runway
- Cultural Brick
- Dreamland
- Paradise
- Fleet
- Bloom

**Accessory**
- Trim ‘A’ straight Bonded (24”x4”, 24”x3”, 24”x2”)
- Trim ‘B’ Bevel Bonded (24”x4”, 24”x3”, 24”x2”)

Available Surface Finish:
- Glossy
- Matte
- Customized dimensions and patterns are possible on request.
- All sizes are norminal
